

SVHC/REACH information

In compliance with Article 33 of the REACH Regulation, we hereby inform you that the brass items or components you received from us contain more than 0.1% lead.

Name of the substance: Lead

CAS number: 7439-92-1

EC number: 231-100-4

Reason for inclusion: toxic for reproduction

Inclusion date: 27.6.2018

Products affected:

- Brass manifolds, manifold connection kits, and heat meter connection kits
- Clamp connectors, connection screws, connection couplings, double nipples, reducers, equalisers, adapters, ball valves, thermowells
- Balancing valves, circuit-control valves and zone valves
- Geniux adapter kits for manifolds, heaters and radiators

Additional voluntary information:

The new obligation to provide information through REACH stems from the addition of lead to the REACH Candidate List by the European Chemicals Agency. Lead belongs to a group of substances known as heavy metals. Direct exposure to it can have negative impacts on human health and the environment.

One of the goals of including lead in the REACH Candidate List is to obtain information about the amount of this substance used within the EU. However, the inclusion of lead in the list is not based on any findings regarding the safety of our products when they are used as intended. This applicability is based on the evaluation criteria for metals of 26.3.2018 laid down by the German Federal Environmental Agency, which is based on the Directive (EU) 2015/1535 of 9.9.2015 of the European Parliament.
